

Moore Momentum (MM) — UI Design Prompt for Claude Design Tool

How to use this prompt: Paste the entire prompt below into Claude (or your design tool). For best results, request **one screen at a time** — start with the *Default Rocket Dashboard* (Phase 2 home), then iterate outward. The "Master Brief" sets the universe; the "Screen-by-Screen" section specifies each artifact.

MASTER BRIEF (paste this with every screen request)

You are designing the UI for **Moore Momentum (MM)** — an AI-powered, gamified self-improvement mobile + web app that turns leveling up across the **5 Core Areas of Life** (🧠 Mindset, 💰 Career & Finances, 👥 Relationships, 💪 Physical Health, 🧘 Emotional & Mental Health) into an ethically addictive space adventure. The player pilots a rocket through the cosmos; daily habit check-ins move the ship; consistency unlocks upgrades, planets, and identity transformation.

Core Design Principle (non-negotiable)

Every design decision answers ONE question: **"Will the player want to come back tomorrow?"** Daily use must feel like a game, not a chore. Reward effort, never punish failure. Setbacks are reframed as data, never shame.

Aesthetic Direction

- **Vibe:** *"Tron meets Stranger Things meets vintage arcade game"* — 80s neon nostalgia fused with futuristic optimism. Steampunk-sci-fi hybrid. Cinematic cockpit energy.
- **Mood:** Electrifying, hopeful, mission-control serious-but-playful. Confident. Immersive.
- **Reference points:** Cyberpunk 2077 HUDs (cleaner), Apollo mission control panels, Destiny 2 vault UI, Halo waypoint displays, retro CRT scan-lines used sparingly.

Brand System (use exactly)

Typography

- Display / headers / numerals / mission titles: **Orbitron** (geometric, futuristic, tech-y)
- Body, dialogue, microcopy: **Red Hat Display** (humanist, readable, modern)

Primary Palette

Color	Hex	RGB	Use
Momentum Blue	#2a7de1	42, 125, 225	Primary actions, Mindset Core highlights, navigation accents
Ignition Red	#ea0029	234, 0, 41	Critical alerts, streak fire, "launch" energy

Secondary Palette

Color	Hex	Use
Cosmic Teal	#00a98f	Physical Health Core, success/forming states
Solar Yellow	#ffc629	Achievements, badges, Mystery Box, Space Credits
Deep Navy	#111c4e	Primary background — space depth
Midnight Black	#171d1a	Pure backgrounds, panel base
Cool Gray	#20372e	Locked states, inactive Cores
Subtle White	#f1f1f1	Body copy on dark

Core Visual Language

- **Default backgrounds:** Deep Navy (

#111c4e

) → Midnight Black (

#171d1a

) radial gradients, with subtle starfield, scan-lines, or noise grain (3-8% opacity).
- **Glow language:** Each of the 5 Cores has its own neon halo color (Mindset = blue, Career = yellow, Relationships = magenta/pink, Physical = teal, Emotional = violet — pick the magenta + violet to round out the palette consistently across all screens).
- **Locked states:** Greyscale + soft gold lock icon, subtle pulse animation hinting they CAN be unlocked. Never demanding, never shaming.
- **Habit color progression (CRITICAL — applies everywhere habits appear):**
 - Bad habit → Golden Habit forming → MBMs attached → Fully formed → Trophy Room
- **Iconography:** Custom line+glow icons (rocket, planet, shield, wings, thrusters, ring, infinity, checklist, steering wheel). NOT generic Material/Apple SF symbols.
- **Motion:** Cinematic. Reward moments get full celebration animations (particle bursts, ship trajectory arcs, lock-shatter, fireworks). Failure moments get calm, informational animations — NEVER red flashing or shake.
- **Surfaces:** Slightly glassmorphic panels (10-15% opacity, blur ~12px) with thin neon hairline borders. Sharp 90° corners or 4-8px rounded — pick one and hold it across the system.

Voice & Tone (for all UI copy)

- **Nova AI** (the in-app companion) speaks like a confident mission controller, NOT a cheerleader. Direct, warm, science-anchored. "Got it." "Logged." "Moving on." "That's data, not defeat."
- Players are addressed as "**Player One**" / "**Captain**" — never "user."
- Action verbs: launch, ignite, fire on all cylinders, break gravity, lock in, forge.
- NEVER use punitive language. Missed days = "relaunching from last checkpoint."

Target User Reminder

Entrepreneurial-minded 18-35 year olds who are skeptical of generic self-help, fluent in tech, and addicted to dopamine. The UI must out-design Calm, Headspace, and any competing habit app — and feel closer to a AAA game cockpit than a productivity app.

What to AVOID

- Generic AI/SaaS aesthetics (purple gradients on white, Inter font, soft pastel cards)
 - Punitive red error states or shameful empty states
 - Flat illustration "yoga people" stock styles
 - Hand-holding microcopy ("Don't worry!" "Great job!" — too saccharine)
 - Cliché gamification (cartoon trophies, kid-game confetti)
-

SCREEN-BY-SCREEN SPECIFICATION

The app has **two phases**, each with multiple screens. Phase 1 is one-time foundation building (a "character build"). Phase 2 is the daily execution loop where players spend most of their time.

PHASE 1, STAGE 1 — Habits Hierarchy System (HHS)

Discovery: Pinpoint a pain point and forge a personalized Golden Habit.

Screen 1.1 — Landing / Intro

- Full-bleed deep navy starfield, parallax stars
- Hero rocket centered, gentle hover animation, soft engine plume glow
- 5 Core icons orbit faintly around the rocket body (one Core highlighted in rotation)
- Headline (Orbitron): "**READY PLAYER ONE?**"
- Sub (Red Hat Display): "Pilot your rocket. Save the planet. Level up your life."
- Single pulsing CTA: [**PRESS START**] — neon blue, glowing rim, scan-line accent
- Earth visible in the lower foreground, distant planets (Moon, Mars, Jupiter, Saturn, Pluto) in the deep background

Screen 1.2 — Mission Brief / Intro Sequence (3 micro-screens)

- Screen A: Earth from space, AI voice card from Nova: *"Planet Earth is on the brink of self-destruction 🚀🌍. The only way to save it..."* — with WHO / WHAT / HOW pillars
- Screen B: Rocket on launchpad with all 5 Cores in full color, then morph to greyed/locked → signaling the journey begins
- Screen C: **Habits Hierarchy Pyramid** — 5 stacked levels, each with a lock icon and an emoji marker:
 1. 🔍 Pain Point Scanner
 2. 🧠 Core Connection
 3. 📖 Universal Principle
 4. 🔑 Keystone Creator
 5. ✨ Golden Habit Forge

Screen 1.3 — HHS Conversation (Steps 1-5)

- **Layout:** Full-screen chat with Nova AI (left avatar = stylized cosmic helmet/orb, glowing teal). Player input docked at bottom. Top of screen shows the **Hierarchy Pyramid** mini-map — current step highlighted with a pulse, completed steps lit in full color with green checkmark.
- **Progress bar (top edge):** 5 segments matching the 5 steps. Filling segment animates with energy crackle.
- **Question types:** mix of multiple choice cards, sliders (1-10 emotional impact), short text, confirmation pills (Yes / Adjust).
- **Reward beats every 2-3 questions:** Floating "+10 Momentum Points" pill drifts up; achievement unlocks ("🏆 Truth Seeker," "Core Confirmed," "Principle Decoder," "Keystone Forger," "Golden Habit Architect") trigger a brief celebration animation (particle burst + Orbitron callout).
- **Express vs Comprehensive Mode toggle** in top right — adapts question depth.

Screen 1.4 — Pain Point Reframe Card

- After Step 1 conversation, show a styled summary card:
 - 😞 **Primary Challenge:** [generated text]
 - Two pills: [**Yes, that's it**] / [**Adjust**]
- Background of card: subtle pulsing aurora effect.

Screen 1.5 — Core Map (Step 2 visual)

- Visualize all 5 Cores as orbiting nodes around the player's pain point at center.
- **Primary Core** glows brightest with pulsing ring; the other 4 show **ripple effect lines** animating outward (connecting strands of light), with mini Current State / Potential State

cards expandable on tap.

Screen 1.6 — Universal Principle Reveal (Step 3)

- Card flip animation revealing a "sacred tablet" style panel: principle name in Orbitron, short description, a small constellation drawn behind it. Feels earned.

Screen 1.7 — Golden Habit Forge (Step 5 final)

- Animated forging visual: raw materials (the player's strengths, passions, obstacles drawn from Momentum Lists) flow into a glowing furnace and emerge as a single **Golden Habit Card**.
- The card shows: Habit Name, Cue/Trigger, Action, Reward, Starting Version (MVA), and a built-in **IF-THEN Obstacle Plan** in a smaller nested box.
- Two CTAs: [**Lock It In** ] / [**Refine**]

Screen 1.8 — Command Center Reveal (REWARD UNLOCK)

- **Major celebration moment.** Screen darkens, vault doors slide open, Momentum Lists fly in one by one with a typewriter-then-glow effect:
 -  Back to the Future / Legacy Goals
 -  Routines
 -  Obstacles
 -  Passions
 -  Strengths
 - (more lists unlock progressively at planet milestones)
 - Headline: "**COMMAND CENTER UNLOCKED** "
 - Below: a 2x3 or 3x2 grid of "Momentum List" cards, each with icon + list name + count of stored entries.
-

PHASE 1, STAGE 2 — Momentum Boosting System (MBS)

Engineer the Golden Habit into something automatic with the 3 MBMs.

Screen 2.1 — Level 2 Intro

- Hero visual: rocket in orbit with the activated Core glowing
- Three MBM icons hover in locked state, pulsing with energy:
 -  **OBVIOUS** (Make it Obvious / Attractive)
 -  **EASY** (Make it Easy)
 -  **REWARDING** (Make it Fun / Rewarding)
- Progress bar updates from "Level 1  " to "Level 2 → 0/3 MBMs"

Screen 2.2 — Obstacle & Opportunity Diagnostic

- Conversational with Nova, but with **obstacle indicator visualizations** — the friction point appears as a pulsing red blockage on a stylized "habit pathway" diagram.

Screen 2.3 — MBM Strategy Selection (×3 screens, one per MBM)

- Each MBM gets its own themed screen:
 - **Obvious** → magnifying glass / spotlight visuals
 - **Easy** → smooth flow / friction lines being erased
 - **Rewarding** → confetti / dopamine burst visuals
- Each presents 2-3 personalized strategy cards. Player picks one. Card flies into a "habit stack" panel below.

Screen 2.4 — Personal Assistant Mode (AI Agent reveal)

- Reveals automation capabilities: *"I'll handle the setup. Here's what I'm doing for you →"*
- Animated checklist of one-time setup actions (calendar block created, sticky note ordered, app installed). Each item self-checks as if Nova is doing it.

Screen 2.5 — Space Cantina Unlock (PHASE 1 CULMINATION REWARD)

- **Cosmic doors part open** revealing a vibrant cantina interior — neon signs in Orbitron, alien silhouettes at tables, Tribe banners hanging.
 - Four pillar cards reveal in sequence:
 - 💡 **Ideas Well** (crowdsourced Golden Habits / MBMs)
 - 🤝 **Interstellar Collaboration** (Tribes & accountability partners)
 - 🏆 **Leaderboards** (anti-shame, multi-factor)
 - 🏆 **Weekly Competitions**
 - Tribe matched: e.g., "Energy Warriors" — shown as a unit patch the player earns.
-

■ PHASE 2 — Gamified Daily Execution (THE HEART OF THE APP)

This is where 80% of the player's time is spent. Design priority: this set first.

Screen 3.0 — Phase 2 Launch Animation

- Phase 1 completion banner fades → rocket lifts off → camera follows it into deep space → seamless transition into the Default Rocket Dashboard.

★ Screen 3.1 — DEFAULT ROCKET DASHBOARD (Home / Cockpit) — *most important screen in the app*

Layout (mobile-first vertical):

- **TOP BAR**

- ☰ Hamburger menu (top left) → Command Center, Space Cantina, Phase 1 return, Settings
- 🏆 Trophy Room icon (next to hamburger)
- 🔥 **Streak Counter** (top center) — shows "Day X" with a flame whose size grows with streak length
- 📊 **Stats Box** (top right) — three stacked mini stats: Current Planet (Moon/Mars/etc.), Momentum Score (numeric), Balance % (7-day rolling)

- **HERO ROCKET (center stage)**

- Stylized rocket rendered with the player's earned Wings / Armor / Thrusters upgrades visually applied
- The 5 Cores rendered as **5 distinct sections of the ship body**, each glowing in its Core color when ACTIVE, greyed with a gold lock when INACTIVE
- Engine plume animates at idle (subtle), intensifies when streak is hot
- **Tip-of-rocket icon row** (just above the ship) — 4 quick-access glowing icons:
 - 🕒 Steering Wheel → Command Center / Momentum Lists
 - 🕒 Clock → Routines by time of day
 - ∞ Infinity → All Habits Quick View
 - ✅ Checklist → Non-Routines

- **PRIMARY CTA (impossible to miss)**

- [**DAILY CHECK-IN**] — bold, glowing, pulsing button. Largest interactive element. Subtle 3D press animation. Sits below the rocket.

- **BACKGROUND**

- Deep space starfield with **Zoomed-Out Planet Journey arc** visible faintly behind/around the rocket — dotted trajectory line from Earth to current planet target, current rocket position marked on the arc.

- **BOTTOM NAV** (subtle, secondary)

- All Habits / Space Cantina / Trophy Room / Profile

Screen 3.2 — Optional Mantra & Grateful List (pre-check-in)

- Clean card layout. Player's mantra in large Orbitron quotation block.
- 3 numbered text fields below for daily gratitude entries.
- Two CTAs equally weighted: [**Open it**] / [**Skip — straight to scoring**]

Screen 3.3 — Daily Check-In: Score Your 5 Cores (MAIN DAILY RITUAL)

- **One Core at a time** (full-screen card progression — swipe or "Next").
- For each ACTIVE Core:

- Core icon + name in Core color at top
- **BTTF Vision** quote card: "I am an energized, active person who..."
- Habit list (Routine + Non-Routine) with their color-progression dots (●/●/●)
- **Score Slider 1-5** — the hero interactive element. Slider is large, satisfying, with full labels visible on first session:
 - 1 = Completely skipped
 - 2 = Partial
 - 3 = Got through it but struggled
 - 4 = Solid — minor friction
 - 5 = Nailed it
- Slider lock-in animation (4-5 = celebratory pulse; 1-3 = calm acknowledgment, never red)
- **Captain's Log** prompt field below — multiline, optional. Auto-saves with  Logged confirmation.
- For LOCKED Cores: greyed card with gold lock, soft pulse, copy: *"Not yet activated. Return to Phase 1 to ignite this Core."* with a subtle [Return to Phase 1 →] link.

Screen 3.4 — Mission Control AI Intervention (CRITICAL EMPATHY DESIGN)

- Triggered when a habit scores ≤ 3 for 3+ consecutive days. Slides in from right as a clean information panel — **NEVER an alarm popup**.
- **Pattern Detected** card at top: simple bar chart showing last 3 days (e.g., 2 | 2 | 2) with the line: *"Pattern detected: 3 consecutive days at or below 3.0."*
- Reframe copy: *"That's not failure — that's your habit telling you something needs adjusting."*
- **Three resolution path cards** (equally weighted, no "recommended" highlight):
 - ⚡ **QUICK SUGGESTION** (under 2 min)
 - 📖 **GO DEEPER** (5-8 min, returns to Phase 1)
 - ✎ **MANUAL EDIT** (full control)
- After selection, Quick Suggestion path shows: a "Mission Control Analysis" card pulling from Captain's Log entries, Obstacles List, and Lifestyle Factors → diagnoses cue competition / friction → suggests one tweak → activates as a  **Experiment** with 3-day check-in cycle.

Screen 3.5 — Progress Summary (post-check-in rewards screen)

- Each stat reveals **one by one** with brief counter animations — never all at once.
- **Sequence:**
 1. Momentum Points earned today (+25, animated counter)
 2. Total Momentum Score
 3. Streak Counter — flame icon ignites/grows
 4. Space Credits earned + total

5. **Planet Journey Arc** — visual rocket movement along the trajectory line, with new % filled
 6. **5-Core Balance Meter** — horizontal bars per Core (filled per yesterday's score, empty + locked icon for inactive)
 7. **Today's Focus** card — AI-generated, 3-4 bullets pulling from active habits and flagged items ()
 8. **Ship Status** panel — Wings / Armor / Thrusters progress, "First Available Upgrade" callout
 9. **Daily Challenge** card with [Accept] / [Skip] CTAs
- **Mystery Box reveal (10-15% chance):** if triggered, a glowing wrapped box appears mid-summary with 2-3s anticipation animation, tap-to-reveal explosion → reward card flips up (bonus credits / streak saver / cosmetic / personalized alien message).

Screen 3.6 — Trophy Room

- Themed as a **museum gallery in deep space** — pedestals, soft spotlights, glassy displays.
- Trophies organized by Core (5 sections, each with its color theme).
- Each formed habit gets a **unique trophy rendering** based on the habit type (e.g., a glowing dumbbell-shaped crystal for fitness, a constellation for mindset).
- Tap a trophy → opens the Detailed View of that habit + formation date + identity-framing message: *"This habit is now part of who you ARE."*
- Empty state: faint silhouettes of "future trophies" — invitation, never absence.

Screen 3.7 — Space Cantina

- Recreate the Phase 1 reveal moment but as a navigable hub.
- **Four panel zones** (cantina booths):
 -  **Ideas Well** — Reddit-style upvote feed of community Golden Habits / MBMs, with **Click-to-Adopt** on each card
 -  **Tribes** — feed of your matched Tribe (e.g., "Energy Warriors") with member count, recent posts, accountability partner match button
 -  **Leaderboards** — multi-factor (Momentum Points, longest streak, habits formed, ripple effect score) — anti-shame: every player visible, ranked but not punished
 -  **Weekly Competitions** — current contest banner, prize callout, [Join] CTA

Screen 3.8 — Ship Bay (Upgrade Shop)

- Garage-meets-cockpit feel. Three upgrade categories displayed as workbenches:
 - **Wings** (unlocks more Momentum Lists + alien content)
 - **Armor** (streak protection, grace periods)
 - **Thrusters** (more Momentum Points per check-in)

- Each shows tiers: Common → Rare → Very Rare → Epic, with rarity color-coded borders (silver / blue / purple / gold).
- Locked tiers show level requirement: "Unlocks at Navigator (Level 2)" / "Commander (Level 3)."
- Currency displayed top right in Solar Yellow:  Space Credits balance.

Screen 3.9 — Command Center (full view)

- Grid of all unlocked Momentum Lists as expandable cards.
- Each card: icon, list name, entry count, last updated date, "Cross-references" indicator (shows how many other lists this connects to).
- Tap any card → list detail screen with auto-tagged AI entries + a manual [+ Add] button.
- Locked lists shown as ghost cards with unlock requirement: *"Unlocks at Mars (Wings Upgrade)."*

Screen 3.10 — Detailed Golden Habit View

- The "living document" for each habit.
- Sections: Cue/Trigger · Action · Reward · MVA Backup · IF-THEN Obstacle Plan · Attached MBMs (3 cards) · BTTF Vision link · Core link · Score history (sparkline graph) · Captain's Log entries (filtered to this habit).
- Color status pill at top:  /  /  / .
- [Edit] / [Flag for Refinement] / [View in Trophy Room] CTAs.

Screen 3.11 — Level-Up Moment (Cadet → Navigator → Commander)

- Full-screen takeover. Rocket animates dramatically — new visual upgrades applied in real time.
- Headline: "NAVIGATOR ACHIEVED" (Orbitron, neon).
- Unlocked benefits list: 1.25× credit multiplier, Rare-tier upgrades, etc.
- Single CTA: [Continue Mission].

 COMPONENT LIBRARY (build these consistently across all screens)

Component	Spec
Glassmorphic Panel	bg: rgba navy 60%, blur 12px, 1px hairline border in Core color, 6px corner radius
Score Slider	280–340px wide, glowing track in Momentum Blue, thumb is a neon orb, snap detents at 1/2/3/4/5
Core Card	Aspect 4:5, Core icon top, status pill, glow halo in Core color when active

Component	Spec
CTA Button (Primary)	Momentum Blue fill, Orbitron uppercase label, neon outer glow, pulse animation when idle
CTA Button (Secondary)	Transparent fill, 1px Subtle White border, hover = blue glow fill
Reward Pill	Solar Yellow text "+25 MP" floats up + fades, particle trail
Streak Flame	Animated SVG, scales 0.6× → 1.4× as streak grows from 1 → 365 days
Lock Icon	Solar Yellow on greyed-out element, soft 1.5s pulse
Momentum List Card	Icon top-left, count badge top-right, 3 most recent entries previewed below
Captain's Log Entry	Quote-styled card with date stamp, Core color accent stripe on left edge
Mystery Box	Wrapped glowing cube, idle floating animation, tap-to-reveal explosion
Mission Control Alert	Slide-in panel from right, ⚠ amber accent (NOT red), data viz card, 3 path options
Progress Bar	Multi-segment (one per checkpoint), each segment fills with energy crackle animation

 ANIMATION PRINCIPLES

Moment	Treatment
Successful action / Score 4-5	Particle burst, light pulse on the affected Core, sound: soft synth chime
Streak milestone (7/14/21/30/60/90/180/365)	Full-screen takeover, flame grows dramatically, badge unlocked card flies in
Planet arrival	Camera dollies forward, planet fills screen, alien guide silhouette appears with principle reveal
Mystery Box trigger	2-3s anticipation float, tap → cube explodes, reward card flips up
Level up (Cadet→Navigator→Commander)	Ship visually transforms in real time, new upgrades materialize on hull
Failure / Low score	Calm dim, no shake, no red flash. Subtle amber pulse. Reframing copy.

Moment	Treatment
Form a habit (14d × 80%)	Trophy materializes in Trophy Room with glow + identity-framing text
Lock unlocks	Lock shatters into particles → green checkmark fills the empty slot
Page transitions	Cinematic — never abrupt cuts. Use depth (parallax stars), camera drift, ship trajectory continuity

LAYOUT & RESPONSIVE NOTES

- **Mobile-first** (375–430px width primary). Hero rocket should be 60–70% of viewport height on home screen.
- **Tablet/desktop:** widen the dashboard into a true cockpit — side rails for navigation, larger planet journey arc, multi-pane Captain's Log.
- **Safe areas:** respect notches; bottom CTA button never covered by gesture indicator.
- **Touch targets:** minimum 48px; sliders 56px tall for thumb-friendliness.
- **Performance:** prefer SVG + CSS for animations on critical paths (dashboard, check-in). Reserve heavy WebGL/Canvas for the **planet arrival** and **level-up** moments only.

DELIVERABLE REQUEST FORMAT

When generating each screen, please produce:

1. A **named, production-ready React component** (or HTML/CSS if specified) using the exact brand tokens above
2. **Inline comments** flagging where real data should be wired in (e.g., `// PULL FROM: player.activeCore`)
3. **Tailwind utility classes** OR a single co-located stylesheet — match what the dev team uses
4. **Mobile-first responsive** layout with breakpoints at 768px and 1024px
5. A **brief design rationale** (3–5 sentences) explaining the bold creative choice, NOT a generic description

SUGGESTED ORDER OF DESIGN GENERATION

To maintain coherence as the system grows, generate screens in this order:

1. **Default Rocket Dashboard** (Screen 3.1) — sets the entire visual language

2. **Daily Check-In: Score Your 5 Cores** (Screen 3.3) — the core daily ritual
 3. **Progress Summary** (Screen 3.5) — the reward payoff
 4. **Mission Control Intervention** (Screen 3.4) — proves the empathy design
 5. **Trophy Room** (Screen 3.6) — proves the identity transformation moment
 6. **Command Center** (Screen 3.9) and **Space Cantina** (Screen 3.7)
 7. **Ship Bay** (Screen 3.8) and **Detailed Habit View** (Screen 3.10)
 8. **Phase 1 screens** (1.1 → 2.5) — foundation flow, less time-sensitive
 9. **Level-up moment** (Screen 3.11) — final polish
-

FINAL GUARDRAIL

Before submitting any design, sanity-check it against these:

- ☐ Would a 25-year-old who plays Destiny 2 think this is cool?
- ☐ Does this feel more like a cockpit than a productivity app?
- ☐ Is failure framed as data, never shame?
- ☐ Is the streak / planet / rocket visible at all times so progress always feels alive?
- ☐ Are the Cores color-coded consistently with the brand palette?
- ☐ Does the Daily Check-In button pull the eye more than anything else on the home screen?
- ☐ Did I use Orbitron + Red Hat Display, NOT Inter or any system font?

If any answer is no — redesign before shipping.

End of Master Prompt.
